HOLDINGS OF "PLANHEFTE" BY BOOK & DOC. SECTION, MRLG

Brief description:

The Planhefte are manuals which contain descriptions and appraisals of the native survey records and mapping of countries and broad geographical regions of interest in the pursuance of German, viz. Third Reich aspirations: details of triangulation, levelling data, grids and coordinate systems, maps and map series. These are supplemented by cover diagrams which portray trig and levelling networks, datums, sheet lines and numbering of map series and their coverage. The manuals also include details of German and other non-native mapping of the particular regions covered by the study, and of the availability of maps and survey data to the German Forces for their use, both of original German products and of German-printed stock of non-German native mapping (eg. German reprints of UK Ordnance Survey "One-Inch" maps, &c). The manuals also include useful reference lists of sources used by the compilers, the Oberkommando des Heeres (OKH in short) [German High Command], Abt. f. Kr. Kt. u. Verm. Wes.

Period of publication of the Planhefte is 1935-1944, some of the later ones never having been produced beyond the draft stage.

Useful reference to all German Mil-Geo maps and studies produced by OKH, is the "Länderweise Zusammenstellung aller Karten und Mil-Geo-Arbeiten", ref. C22/A7/B58 and B59, which of course includes all the Planhefte produced or those in preparation. The last edition held of the "Länderweise Zusammenstellung..." is 1943, with amendments 1 (1.5.44) and 2 (1.7.44)

Note: The following list shows those Planhefte known to be held by MRLG and is not necessarily complete, because a stock is held of German WWII Mil-Geo documentation which still remains to be catalogued and may include Planhefte. Necessary amendments to the present listing will be made later.
