MANUAL
OF
MAP CLASSIFICATION
AND CATALOGUING

PREPARED FOR USE IN THE
DIRECTORATE OF MILITARY SURVEY
WAR OFFICE.

London

August 1952

#### GENERAL NOTE

The whole aim of the organisation of a Map Library is to arrange and catalogue the contents in such a way as to make all the information it contains readily available for consultation and use, to keep the collection up to date, and to assure that new maps received can be assimilated in the shortest possible time.

The arranging and cataloguing involves the development of a series of processes, one following logically upon the other, through which a map passes from the time it is received until it has been recorded in a map catalogue and put away in a map press. Where the reorganisation of an existing collection is involved each map should be regarded as one newly acquired and treated accordingly.

In the War Office Map Library provision is also made for:-

#### 1. ADMIRALTY and FLEET CHARTS.

#### 2. BOOKS.

- a. Guide Books
- b. Postal Guides
- c. Transportation Time Tables
- d. General Works on Geodesy, Survey, etc.
- e. Books on the mapping of Individual Countries
- f. Technical Manuals, etc.
- g. Gazetteers
- h. Glossaries
  - i. Symbol books and specifications
  - j. Atlases
  - k. Catalogues produced by Mapping Agencies
  - 1. Dictionaries
  - m. GSGS Notes on Mapping
  - n. Admiralty Pilots
- 3. PERIODICALS covering Cartographical and Geographical subjects.

#### REPORTS 4.

- Communications
- International Boundary Changes
- Administrative changes in foreign countries C.
- d. Place Name changes
- Terrain, etc. .
- f. Military Intelligence
- Periodical Reports by Mapping Organisations
- h. Accessions Lists (G.S.G.S. and other Agencies)
- i. Scientific Expeditions
- j. Economic Resources
- k. Census Reports

#### AIR PHOTOGRAPHS

- a. Catalogues of Air Cover
- b. Cover Diagrams of Air Cover

#### ORIGINAL DOCUMENTS, etc. 6.

- Map Appraisals and History of Mapping Progress in Individual Areas
- b. Cover Diagrams
- Theatre Indices
  - (i) G.S.G.S.
  - (ii) A.M.S.
- d. Running Revision Sheets
- e. History Sheets of G.S.G.S. maps
- Original Surveys
- g. A.M.S. Compilation Record Sheets
- h. A.C.I.S. Compilation Instructions
- i. A.C.I.S. History sheets

#### PROCEDURE

Maps and other acquisitions can be divided into two categories :-

- Items ordered to fill known gaps in the Library
- (a) Items ordered to fill known gaps in the Libra(b) Items sent as gifts or those captured in War.

Items under 'b' are first checked against material already held to determine whether they are of sufficient interest or value to be retained - if so, they are treated in the same way as those specially ordered.

- 1. All items are entered in a Daily Record Book, which provides an inventory of all material received in the Map Library, giving details such as:- Title, Scale (if any), number of sheets (if maps), date, source and date of receipt.
- 2. Each item is stamped with the Library Stamp which bears the date of receipt.
- 3. They are then passed to the Cataloguing Section and distributed among the Cataloguers who are each responsible for certain areas.
- 4. The items are first classified according to the Classification system (see Description and Use below), entered in the proper Section of the Hand List, then given the appropriate catalogue reference and a unique sequence number. This reference and unique number are then written on the map in a box provided on the Library stamp.
- 5. A catalogue card is prepared according to the rules described below, and is then sent for typing. When typed it is checked for errors and filed in its proper place in the Card Index.
- 6. Each cataloguer is responsible for compiling his own Accessions List. The individual lists are collated by an Assistant who arranges them according to areas and sends them to the typist.
- 7. Before filing the material any new information which may be of interest to the Research Section is recorded on a specially designed form which is passed to that Section for filing in loose-leaf folders.

#### CLASSIFICATION

#### DESCRIPTION

The classification scheme which is appended is designed to enable maps to be classified easily and quickly. The one aim is simplicity and care has been taken to keep the number of figures used at a minimum.

provision is made for all maps available and for those which may become available in the future. A brief description of the scheme is as follows:

Letters of the alphabet are allocated to the main divisions, which are as follows:

	A	The Universe (astronomic charts, etc.)
	В	The World
	C	Europe
	D	Asia
_	E	Africa Americas (N&S ie Western Henrisphae)
	F	
	G	Central America and West Indies
	H	South America
	I	Australasia
		Pacific Ocean (and islands not adjacent to continents)
	K	Atlantic Ocean(and islands not adjacent to continents)
	L	Indian Ocean ( " ")
	M	Arctic Regions( " " )
	N	Antarctic Regions (" " )

# EXAMPLE OF CLASSIFICATION OF PROVINCES (YUGOSLAVIA)

EXAMPLE OF CLASSIFICATION OF COUNTRIES, SEAS, ETC.
(EUROPE)

TO FACE PAGE 4

- 8. If a new map covers an area for which new maps are being compiled, the cataloguers pass one copy immediately to the Compilation Section, recording it as issued to that Section. The other copy is filed in its appropriate place in the Map Press.
- 9. The same procedure is followed when dealing with a map which forms part of a series already in the Library. It is closely investigated for new features, for revisions and for new topographical information and, if necessary, the existing index card is amended.

The sheet is also checked against the Graphic Index and the Series sheet Catalogue. Its existence and dates are recorded on both and the proper catalogue reference is written on it. It is examined for possible additional entries and is recorded on the Accessions List.

#### 10. Cover Diagrams and Theatre Indices

Cover Diagrams are in preparation showing Map Library holdings of Series on all scales of all countries. Those responsible for keeping them up-to-date do so as soon as any new sheets are received.

The same applies to Theatre Indices, but on a Theatre Index the date of the sheet is recorded as well as the existence of the sheet.

Procedure in the Research Section and Air Photograph Section is dealt with separately.

OJROW . CLASSIFICATION OF CONTINENTS & OCEANS 0 1 1/1

WORLD CLASSIFICATION OF CONTINENTS & OCEANS

TO FACE PAGE 3

#### First Subdivision

Each of these divisions is then subdivided, each subdivision being given an arabic number.

The world is divided into twelve major areas. For example,

B 1 = World general

B 2 = Northern Hemisphere

B 3 = Southern Hemisphere

B 4 = Eastern Hemisphere

etc.

In the continental divisions C - I, M, N the subdivisions are allocated to countries which are arranged in alphabetical order and numbered consecutively. For example,

C 1 = Europe general

C 2 = Europe, Seas, Gulfs, Channels, etc.

C 3 = Andorra

C 4 = Austria

C 5 = Balkans

etc.

It should be noted that figure one following a letter is always reserved for general maps of a continent, and figure 2 for Seas, Gulfs, Channels etc.

Some areas have been placed under their collective name in the alphabetical order, for example, Balkans, Baltic States, Scandinavia. Where this is the case, countries which comprise the area are listed in alphabetical order immediately following the collective names, and the sequence of numbers is carried through. For example:

C 5 = Balkans (general)

C 6 = Albania

C 7 = Bulgaria

C 8 = Greece

C 9 = Romania

C 10 = Yugoslavia

C 11 = Baltic States (general)

C 12 = Estonia

C 13 = Latvia

C 14 = Lithuania

In the 'Ocean' divisions, J, K, and L, the sub-divisions are allocated to island groups and to individual islands where they do not form part of a group, arranged in alphabetical order. For example:

J 1 = Pacific Ocean general

J 2 = Alentian Islands

J 3 = Antipodes Group

J 5 = Caroline Islands

J 6 = Clipperton Island

# Second subdivision

The divisions C - N are again subdivided, each subdivision being indicated by a second arabic number separated from the first by a colon. For example:

C 4: 13

The numbers 1 - 9 are reserved for compass divisions in the case of continents and countries and numbers 10 - for the administrative divisions of a country arranged in alphabetical order, but in Island Groups numbers 1 - are allocated to individual islands. For example:

C 1 : 1 = Northern Europe

C 1 : 2 = North-Eastern Europe

C 21: 3 = North-Western France

D 3:4 = Eastern Arabia

E 1:5 = Central Africa

F + 6 = Western Canada

H 3: 7 = Southern Argentina

I 7:8 = South-Eastern Queensland

L 10: 9 = South-Western Madagascar

C36: 10 = Akershus (Norway Province)

C36 : 11 = Aust Agder

C36: 12 = Buskerud

J25: 1 = Atafu Island (Tokelan Group)

J25: 2 = Fakaofo Island

Islands adjacent and belonging to a country, and town plans, are allocated numbers after the administrative divisions, for example:

D 3: 16 = Yemen (Arabia)

D 3: 17 = Bahrain Island

D 3: 18 = Islands in Red Sea

D 3: 19 = Islands off S.E. Coast

D 3: 20 = Town plans

The Town Plans are arranged alphabetically within the classification division, and the name of the town is added to the reference, for example:

D 3: 20 Riyadh

The scheme must be used in conjunction with a good reference atlas which shows not only international boundaries but also the chief administrative boundaries within each country. The atlas should have in addition a good gazetteer.

General maps of the World and of Europe would be classified into B 1 and into C 1 respectively.

Maps showing more than one continent would be classified into the appropriate subdivision of the World. For example, a map of Europe and Asia would be classified into B 6.

Maps showing more than one section of a continent would be classified into the division for general maps of that continent. For example, a map of Central and South Africa would be classified into E 1.

Maps showing more than one country would be classified into a compass division of a continent. For example, a map of Burma, Siam and French Indo China would be classified into the division for South-East Asia, i.e. D 1: 8.

Maps showing more than one administrative district or province would be classified into a compass division of that country. For example, a map of Brittany, Normandy and Anjou would be classified into the division for North-West France, i.e. C 21: 3.

Medium and large scale maps of areas which fall into a particular administrative district or province would be classified into the division for that province.

Atlases and guide books are classified into the division for the Continent or Country they illustrate, and for reasons of economy in shelf space they are further classified into one of three size divisions, which are denoted by the letters a, b and c.

Books under 9 inches are put in 'a' division

- " over 9" but under 12" are put in 'b' division
- " over 12" are put in 'c' division

These letters are placed after the classification number .

For example, Muirhead's guide to Switzerland, which is six and a quarter inches in height would be classified into C 39 a.

#### HANDLISTING

To the classification number obtained from the classification scheme, a sequence number is added to complete the map reference. This sequence number is obtained from the handlist. The handlist is composed of specially designed sheets (see illustration below) which are bound together in 'loose-leaf' form. A separate sheet is given to each classification division

	AREA	CLASSIFICATION NUMBER		
SEQUENCE NUMBER	TITLE	No. of SHEETS	SCALE	DATE
		A 85 M		
		7.	10.00	
				, ·
			10	

"This specimen is reduced in size; the original measures 8" x 5"."

The following is an example of how a sequence number is obtained:

A map of the province of FINNMARK in NORWAY is classified as C36: 13. If it is the only map of this area, it is number

one in that section of the handlist and its reference number is C36: 13(1); the second map classified into this section becomes C36: 13(2) and so on. This means that each map has a unique number.

The entry in the handlist takes the form of abbreviated title, scale and date and number of sheets, in fact enough to enable the map to be identified.

It is desirable that the maps should be arranged in the map presses in a certain order within each general classification division. That is, series of maps although classified as general maps, should be separated from general maps in one sheet and grouped in scale order. Since the order in the map presses follows the order in the handlists the following blocks of sequence numbers are allotted to map series within the various general classification divisions:

#### a) For the World and Continents:

1 - 10 Series larger than 1/250,000

11 - 20 " of 1/250,000 and larger than 1/500,000 21 - 30 " " 1/500,000 " " 1/750,000

31 - 40 " " 1/750,000 " " 1/1,000,000

41 - 60 " " 1/1,000,000 " " 1/1,500,000

61 - 70 " " 1/1,500,000 " " 1/2,500,000

71 - 80 " " 1/2,500,000 " " 1/5,000,000

81 - 90 " " 1/5,000,000 " " 1/10,000,000

91 - 100 " smaller than 1/10,000,000

101 - General maps

# b) For Countries:

1 - 10 Series larger than 1/20,000

11 - 20 " of 1/20,000 and larger than 1/50,000

21	- 30	Series	of	1/50,000 and	larger	than	1/75,000
31	- 40	"	11	1/75,000	"	11	1/100,000
41	- 50	11	**	1/100,000	n	Ħ	1/200,000
51	- 60	Ħ	11	1/200,000	"	"	1/250,000
61	- 70		"	1/250,000	"	11	1/300,000
71	- 80	"	Ħ	1/300,000	U. S. C.	H.	1/450,000
81	- 90	11	Ħ	1/450,000	n	11	1/750,000
91	- 100	o "	sma	aller than 1/	750,000		
101	_	Gener	al 1	maps			

101 - General maps

Where an original series is reproduced by other Geographical Establishments on the same sheet lines, the reproduction is given the same reference number as the original series with the addition of the letters a, b, etc to the sequence number. For example:

The handlisting of Atlases and guide-books is similar to that of maps, a separate page being devoted to each size division. In the handlist the sheets for books follow those for town plans.

The complete handlist is an inventory to the whole collection arranged in the same order as the maps are housed in the map-presses. With it the whole collection can be easily checked. It should be borne in mind that the handlist is the most valuable of all library records and great care should be exercised in its maintenance and use.

#### CATALOGUING

A catalogue card has been designed to guide the cataloguers in the positioning of the information required to be shown. A specimen of this card is given below:

Area	Scale	Date
Filed as Publishing Body o	r Author	
Exact title	2/9/9/4/10/25	
Shows		
No. of sheets	No. of copies	
Source	If bromide, location of origin	al
Date received  J.5859 (5788) 7/42 Wt 28688 100m (8) 9/42 Gp.697 C&	Negative No.	

This design, which is based on that used by the Army Map Service, Washington, has been printed both on paper and on a filing card; the paper form is used by the cataloguers and is known as the manuscript card, the filing card is used by the typists and is filed in the card catalogue. Certain rules have been made for the filling up of this card, and these are set out below:

#### PREPARATION OF MASTER CARD.

#### AREA

The name of the area is to be that mentioned in the title of

the map, or in the absence of a title, that illustrated by the map. The name will be in the vernacular form except where there is an accepted anglicised form. Cross-references will be made from the forms not used as headings (see Cross-references, below).

#### General Maps.

For general maps or series covering, for example, the World, Africa or France, the headings would be

WORLD

AFRICA

FRANCE

additional entries being made where necessary (see Additional Entries, below).

#### Special Area Maps of Continents and Countries.

Where the title of a map describes a major portion of a Continent or Country by a compass division, the map is catalogued under the name of the Continent or Country, followed by the compass division. For example:

Map showing Central Africa Air Routes

would be catalogued under AFRICA - Central.

Map of Central and South Africa

would be catalogued under AFRICA - Central, with additional entry under AFRICA - Southern (see Additional Entries, below).

Where the title describes a specific topographical feature, or district, which covers a major portion of a Continent or Country the heading to be used is the name of the Continent or Country followed by the name of the feature or district prefixed by the abbreviation 'dist.' For example:

The Nile Valley, containing Egypt,
Anglo-Egyptian Sudan, Abyssinia, Somaliland etc.

would be catalogued under AFRICA dist. NILE VALLEY, additional entries being made under AFRICA - North-Eastern, etc (see Additional Entries, below).

# Region de la Ruhr

would be catalogued under GERMANY dist. RUHR, an additional entry being made under GERMANY - Western.

#### Boundary Maps

For maps which illustrate the boundary between two or more countries the heading is to be the name of the first-mentioned country, with the appropriate compass division. Additional entries would be made for the other countries affected (see Additional Entries, below). For example:

Atlas de la Frontiere entre l'Allemagne et la Belgique depuis le Grand Duchie de Luxembourg jusqu'au Royanne des Pays-Bas

would be catalogued under GERMANY - Western, with additional entries under BELGIUM - Eastern, etc.

#### Province and District Maps of a Country.

For maps of a province or district of a Country the area heading takes the form of the name of the Country, followed by the name of the area appearing in the title of the map prefixed by the abbreviation 'dist'. For example:

Geologische Karte von Bayern

would be catalogued under GERMANY dist. BAVARIA.

Karta fizica politica si etnografica a Banatului.

would be catalogued under YUGOSLAVIA dist. BANAT.

Environs d'Amiens

would be catalogued under FRANCE dist. AMIENS.

Where two or more place names are mentioned in the title the map is to be catalogued under the first-mentioned and additional entries made for the others.

#### Maps of Islands.

Maps of islands adjacent and belonging to a country are catalogued under the name of the country followed by the name of the island prefixed by the abbreviation 'Is.' For example

Plan der Insel Borkum

would be catalogued under GERMANY Is. BORKUM. A cross-reference

would be made from BORKUM to this heading (see Cross-references, below).

Maps of islands belonging to a group are to be catalogued under the name of the group followed by the name of the island prefixed by the abbreviation 'Is.' For example:

Map of the Island of Rhodes

would be catalogued under DODECANESE Is. RHODES.

Map of the Island of Ambrim.

would be catalogued under NEW HEBRIDES Is. AMBRIM.

Cross-references are to be made from the individual island to the island group (see Cross-references, below).

Where two or more islands are mentioned in the title the map is to be catalogued under the first-mentioned, and additional entries made for the others.

#### Town Plans.

Town plans are catalogued under the name of the country to which they belong, followed by the name of the town prefixed by the abbreviation 'tn'. For example:

Rigas Ostas Centrala Dala

would be catalogued under LATVIA tn RIGA

Town Plan of Karlovac

would be catalogued under YUGOSLAVIA tn KARLOVAC.

Where there is more than one town of the same name a distinctive note is added after the name. For example:

GERMANY to BRUHL (or COLOGNE)

GERMANY to BRUHL (or MANNHEIM)

Where there are two or more towns mentioned in the title, the map is to be catalogued under the first-mentioned and additional entries would be made for the others.

#### Special Purpose Maps

Maps which deal with a particular subject, for example Geology or Ethnography, are catalogued in the same way as ordinary topographical maps but additional entries are to be made under subject (See Additional Entries - Subject File, below).

#### Scale

The scale of the map is given in the form of the representative fraction, i.e. 1:63,360, not 1 inch to 1 mile. When the scale is not given on the map it is calculated. If only an approximate result is obtained the representative fraction is prefixed with the abbreviation for the word 'circa'.

#### For example c.1:125,000

When a series of maps is published at various scales, additional entries are to be made for each scale (see Additional Entries, below).

#### Date

The date used in the heading is that of the situation portrayed on the map, i.e. the survey date or revision date. The date of publication is only used when no other date is given. Where the publication date differs from the survey or revision date it is entered after the name of the publishing body or author. For example:

# G.S.G.S. 4514 (publ 1944)

If a map is undated, but an approximate date can be arrived at from the detail shown on the map, this assumed date is used, but enclosed in square brackets. Comprehensive dates are to be given for a map in more than one sheet if they differ, for example 1927 - 35.

For a series of maps in progress the date of the earliest sheet is followed by a dash, the latest date being added when the series is completed.

### Filed as

The complete reference number is entered here. This

reference number will have been written on the map when it was handlisted.

#### Publishing Body or Author.

The full name of the Publishing Body or Author is recorded. If the map is produced by a publishing body that gives a code or identification number to maps, that number is also recorded. For example:

G.S.G.S. 4250

A.M.S. T.612

#### Exact Title

An exact transcription of the title of the map is given. Recognised abbreviations may be used, and unnecessary words omitted providing the omission is indicated by three dots.

If the title is in characters other than Roman, it is transliterated and, if necessary, translated, with a note added in brackets "In Russian", "In Bulgarian", "In Arabic", etc. When a map is in two or more languages preference should be given to the language in most common use and a note added in brackets "In French and Russian", "In English and Greek".

If a map has no title, one is made up and enclosed in square brackets.

Short descriptive notes are added after the title, on Insets, Edition, Original material and Supplementary material.

a) <u>Inset note</u>. The exact transcription of the title of an inset and its scale follows the map title and is prefixed by the word INSET in square brackets. The same rules for translation, transliteration and abbreviation are applied as laid down for the map title. For example:

Recent surveys in Southern Abyssinia

[Inset] Chart of triangulation 1/6,000,000

If the insets are of sufficient importance they are catalogued separately, and reference is made to the main maps.

For example:

Principaux bassins du Port de Calais

Inset on Industrie Nordfrankreich Stadtplan.

Maps or plans printed on the reverse of other maps are to be treated as inset maps with the words (on reverse) substituted for /Inset /

b) Edition note. The edition number, other than the first, is always recorded. For example:

Carte des voies interieures navigable de la Belgique ..... 11<sup>e</sup> edition.

c) Original material note. Notes on the source material used for a map should be quoted where possible. These notes usually appear on the map, and examples are:

'Copied from Italian original ..... '

'Reduced from Germany 1/25,000 sheets .....

"Copied from French original dated 1936 with revision .. !

When the Library is in possession of the original material the reference number is quoted after the note. For example:

Germany. Copied from Topographische Karte (Messtischblätter) C22(15) with revision from air photos.

d) Supplementary material. When a map or series of maps is supplemented by an index, book of text or transliteration trace, this is to be mentioned after the title. In some cases the books of text are separated from the maps to which they refer on account of their size and bulk, and are referenced as books. When this is the case the reference number of the books will be quoted after the note on supplementary material. A similar reference to the maps will be made after the title on the card prepared for the books. For example:

Frontiere Greco - Bulgare; Traite de Neuilly du 27 Nov. 1919. (See also) Description de la frontiere de Borne a Borne C 7; b 1. Description de la frontiere de Borne a Borne; Traite de Neuilly du 27 Nov. 1919. (for relevant maps see C 7: 7(2).

#### Shows.

Under 'shows' is given a brief description of the map. The items are to be arranged in the following order:-

1. Projection (if known)

2. Prime Meridian (if other than Greenwich). See list of Prime Meridians and their values on page 29.

3. Grid (if any)

- 4. Boundaries (whether administrative and/or international).
- 5. Relief (whether by contours, hachures, hill-shading, or layer tints. If by contours, interval is to be given).

6. Communications (with number of categories of roads and/or railways).

7. Surface features and other topographical details.

If a map is a reproduction of a map which is already catalogued, but has an overprint showing special information, the catalogue reference of the base map is to be mentioned after the title, and only the special overprint information mentioned under 'shows'.

#### Number of Sheets.

For a series of maps, if the number of sheets is known but the library is not in possession of a complete set, the total number is recorded followed by the word 'incomplete'.

For a series in course of production the number of sheets which will eventually complete the series (if known) is recorded followed by the words 'in progress'.

In a series where extra sheets have been added to the initial layout and have taken their number from adjacent sheets with the addition of the letters A, B, or bis, ter, the number of sheets on the original layout is recorded followed by the full total in brackets. For example, the number of sheets for a series composed of sheets 1 - 6, 6A, 7 - 10, 10A, 10B, 11 - 15 would be 15 (in 18).

Where a map or series of maps is supplemented by a book of text or transliteration trace the information is recorded after the number of sheets. For example:

1 + booklet. 23 + 18 traces.

#### Number of Copies

As a general rule only two copies of each map are kept. When only one original is held, and also a bromide copy of it, the number recorded is '1 + 1 bromide'.

#### Source

The name of the person or institution from whom the map was received is to be recorded in full.

#### If Bromide, Location of Original.

When only a bromide copy, sunprint, blueprint, tracing etc. is held, the type of reproduction used is recorded in this space. The location of the original is also given if known.

#### Date Received

The date inserted here is the one with which the map was stamped when it was first received into the Library.

Where there are two copies of a map which have been received on different dates both dates are recorded.

In the case of a series of maps the date of receipt of the earliest sheet is quoted followed by a dash. When the series is complete the final date is added.

#### Negative No.

Any map of which a negative has been made should have the negative number inserted here if it is known. The location of the negative should also be recorded.

#### List of Additional Entries.

On the reverse of the manuscript master card will be

written a list of all the additional entry headings. These will be typed on the file card. Any subsequent alteration to the master card must be made to all additional entry cards.

#### Maps in Books and Atlases.

Maps which appear in books or atlases and which are judged to be of importance are catalogued in the same way as sheet maps. Reference to the title and page of the book or atlas will be made after the exact title.

#### ADDITIONAL ENTRIES

Additional entries are required for the Main Area File, for the Scale File and for the Subject File (See 'Order of cards in card catalogue', below).

Additional entry cards should be of a different colour from that used for master cards, but if no coloured cards are available some distinguishing mark, such as a black top right-hand corner, should be used.

#### MAIN AREA FILE.

Additional entries are to be made for areas which are important in themselves, but which are included in a series of maps or a general map covering a larger area. These additional entry cards are replicas of the master cards with appropriate changes made in Area heading, in date, in number of sheets etc.

a) Continents or Countries, whole or part, covered by world maps or series. For example, the International Map of the World 1/1M. would require additional entries for each Continent or part of a Continent and also for certain Countries or parts of Countries covered.

The size of the country and the scale of the series must be taken into consideration in the selection of additional entries.

b) Countries, whole or part covered by a general Continental map or series. For example, the Ubersichtskarte von Mitteleuropa 1/300,000 would require additional entries for the Countries or parts of Countries covered.

- c) Special area maps whose title describes some specific topographical feature or district which covers the major portion of a continent or country would require an additional entry under the portion of the continent or country concerned (See Cataloguing Master Card Area, above).
- d) Boundary maps require additional entries under the names of those countries not used as the area heading of the master card (See Cataloguing Master Card Area, above).
- e) Islands covered by a large-scale series or a district map. All important islands and island groups require additional entries where the size of the island and the map scale warrant it.

The number or names of the sheets of a series which cover the islands should be added after the title.

- f) District maps on a large scale which cover a town and environs require an additional entry under the town.
- g) Maps which have two or more place names mentioned in the title require additional entries under those names not used for the area heading of the master card.
- h) Series of maps not uniform in scale require additional entries for all scales used.

#### SCALE FILE

A scale file is maintained for each country. For this file, an additional copy of all master cards, (excluding town plans) and of all additional entry cards prepared for the main area file in sections a, b, d and h above, is made. On these cards the scale is underlined in red.

#### SUBJECT FILE

Additional entries are to be made for maps which describe a particular explorer's or expedition's route and discoveries, and for maps which deal with any of the following subjects: Boundaries

Communications - General, i.e. more than one means of communication.

Air Railways. Roads Telecommunications Waterways

Economics Ethnography Geology.

Where these maps cover more than one continent, country, administrative district or province, additional entries must be made for the Subject file of those continents, countries etc. for which additional entries have been made for the Main Area file (see above).

The additional entry will be a duplicate of the master card with the necessary change made in the area heading.

The types of headings to be used are given below.

a) Maps of explorer's or expedition's routes, etc.

The heading is to take the form of the Area, followed by the explorer's name or the name of the expedition. For example:

> 'Routes in South-West Arabia from surveys made in 1936 by H. St. J. Philby'

would have as the heading: ARABIA - PHILBY, H. St. J.

'Part of Western Se-chuan from a plane-table survey by J. W. Brooke'

would have as the heading: CHINA - BROOKE, J.W.

'The Hispar Glacier and tributaries in the Karakoram Range: Results of the Bullock Workman Expedition'

would have as the heading: INDIA - BULLOCK WORKMAN EXPEDITION.

#### b) Boundary Maps.

The heading is to take the form of the names of the countries affected, followed by the word 'BOUNDARY'. For example, a map showing the German-Polish Boundary would have as a heading:

GERMANY - POLAND, BOUNDARY

An additional entry would also be made under

POLAND - GERMANY, BOUNDARY

for the Poland Subject File.

# c) Communications Maps.

Only those maps which have been specially designed to show communications are to be considered for the Subject file. No general topographical map which shows, inter alia, communications will be included.

The heading is to take the form of the name of the Area, followed by the type of communication. For example:

'Carte des Voies ferrees, Voies navigables et Canaux'

would have as the heading: FRANCE - General Communications.

'Guia Militar de Carrateras de Espana'

would have as the heading: SPAIN - Roads.

'Waterstaats Kaart van Nederland'

would have as the heading: HOLLAND - Waterways.

'Die Elbe'

would have as the heading: GERMANY - Waterways.

# d) Economic Maps.

For those maps which show natural resources, location of industries, etc. the heading is to take the form of the name of the Area followed by the word 'ECONOMIC'.

For example:

'North-west Germany - Economic Resources'

would have as the heading: GERMANY - ECONOMIC

'Mineral Resources of Indo-China'

would have as the heading: INDO-CHINA - ECONOMIC.

e) Ethnographic Maps.

For those maps which show distribution of population, race, religion, language etc. the heading is to take the form of the name of the Area followed by the word 'ETHNOGRAPHIC'. For example:

'Nationalitaten der Südetenländer'

would have as the heading: CZECHOSLOVAKIA - ETHNOGRAPHIC

f) Geological Maps.

For those maps which show geological data, soil types etc. the heading is to take the form of the name of the Area followed by the word 'GEOLOGICAL'. For example:

'Danmarks geologiske Undersogelse'

would have as the heading: DENMARK - GEOLOGICAL

# CROSS REFERENCES.

General cross references are required to be made -

a) from an alternative form of place name to that used as the AREA heading. For example:

ITALY tn LIVORNO

See ITALY tn LEGHORN

SIAM

See THAILAND

b) from individual islands to the country to which they belong. For example:

BORKUM

# See GERMANY Is. BORKUM

c) from individual islands to island groups. For example:

HALMAHERA

See MOLUCCAS ISLANDS - HALMAHERA

CHANNEL THE AREA YMAMEBOL

CA ROAS LOS INT

with acts

### ORDER OF CARDS IN THE CATALOGUE.

#### MAIN AREA FILE

All cards are filed firstly under the name of the area in alphabetical order, secondly under scale, the larger scale preceding the smaller, and thirdly in order of date.

Within each continent the arrangement of the cards is, working from the front to the back of the catalogue drawer, cards for series and general maps, followed by cards for maps of major divisions, followed by books.

Within each country the arrangement is, cards for series and general maps, followed by maps of major divisions, followed by district maps, followed by maps of islands, followed by town plans, followed by books.

### SUBJECT FILE.

Cards of the Subject File follow those of each area file in the following order:

Explorers and Expeditions Boundaries Communications, General

> Air Railways Roads

Telecommunications

Waterways

Economic Ethnographic Geological

### SCALE FILE.

Cards of the Scale File follow those of each Subject File, the larger scale preceding the smaller scale.

#### INDEXING SERIES.

An index will be kept with each series of maps in the map presses and will be marked to show what sheets are held.

The date of each sheet held will be recorded in the Series Ledger, which is composed of specially designed sheets bound together in loose-leaf form. A specimen sheet is given below:

Scries Title and Scale				Area		Classification No.					
Sheet No.	1st Copy	2nd Copy	Sheet No.	1st Copy	2nd Copy	Sheet No	1st Copy	2nd Copy	Sheet No.	1st Copy	2nd Cop
	A TO THE REAL PROPERTY.			1			7				
							4-12-				
	d nes	9 10	000000	9							
								192119		100	
				Saver in							
				an As Ala					30 30 7		
				••••		,					

"This specimen is reduced in size; the original measures 8" x 5"."

Where the printing date differs from the revision or survey date, both are to be shown. The revision or survey date will be mentioned first, and the printing date added underneath in round brackets.

Where only a photo reproduction of a sheet is held, this will be indicated.

All entries will be made in pencil so that alterations can easily be made.

CLASSIFICATION

SCHEME

#### Note

Additions and alterations to sections of the scheme will become necessary due to changes in political and provincial boundaries.

These can be dealt with without any alteration to the scheme as a whole.

Old and new administrative divisions, where they exist side by side in a country, can be combined as shown under FRANCE and SPAIN.

De facto changes in International boundaries can be met by putting after the provinces affected the date at which the change was made. For example several provinces of Poland were ceded to the U.S.S.R. in 1941. After the name of these provinces is written (-1941) and after the name of the new Russian provinces is written (1941-). Numbers have been left vacant between the provinces and the town plans of most countries for any additional provinces to be inserted.

When a country is completely re-organised within changed frontiers which have been universally recognised, the provincial sub-divisions can be re-written, and the maps re-classified.

## INDEX TO ISLAND GROUPS AND ISLANDS

Islands	Country or Island Group	Classification No
Abaco	Bahamas	G 11 :1
Abaiang	Gilbert Is	J 11 :1
Abdal Kuri	Socotra	L 16 :1
Abemama	Gilbert Is	J 11 :11
Abingdon see Pinta		
Abu Ali	Arabia	D 3 :13
Abul Abyadh	Arabia	D 3 :15
Achill	Ireland	C 19 :30
Acklin	Bahamas	G 11 :2
Actaeon Group	Tuamotu Is	J 26 :1
Adak	Aleutians	J 2 :1
Adang	Thailand	D 28 :9
Addu Atoll	Maldive Is	L 11 :1
Adelaide	Falkland Is Dependency	N 5 :3
Adele	Louisiade Archipelago	I 18 :8
Adlavik Is	Canada	F 4:14
Admiralty	Alaska	F 3 :7
Admiralty Is	Bismarck Archipelago	I 13 :1
Adonara	Java	D 40 :24
Aegean Is	Greece	C 8 :42
Aerö	Dermark	C 34 :25
Afognak	Alaska	F 3 :10
African Is	Seychelles Is	L 15 :18

Agalega Is	Seychelles Is	L	15	:1
Agatti Is	Laccadive Is	L	9	:1
Agattu	Aleutians	J	2	:4
Agdlugtoq see Arve- Prinsens				
Agersö	Dermark	C	34	:24
Agga-Lod-Baraij see Southbutton				
Aggas	Greenland	M	4	:27
Agiguan see Agiguwan				
Agiguwan	Marianas Is	J	16	:11
Ago Grande	Portuguese Guines.	E	41	:9
Ago Pequena	Portuguese Guinea	E	41	:9
Agpat	Greenland	M	4	:28
Agrihan see Agurigan				
Agurigan	Line Is	J	16	:1
Ahe	Tuamotu Is	J	26	:5
Ailinginae see Airigin-Ae				
Ailinglapalap see Airingurapurapu				
Ailsa	Greenland	M	4	:27
Airigin-Ae	Marshall Is	J	18	:1
Airingurapurapu	Marshall Is	J	18	:2
Airtawar	Java	D	40	:23
Aitutaki	Cook Is	J	6 :	1
Aiwa	Fiji Is	J	8	:3

Aka-Maru	Gambier Is	J 10 :1
Aki (Truk Is)	Caroline Is	J 4 :8
Akimiski	Canada	F 4 :29
Akun	Alcutians	J 2 :2
Akutan	Aleutians	J 2 :2
Alamagan see Aramagan		
Aland Is	Finland	C 35 :18
Albany	Canada	F 4:31
Albemarle see Isabela		
Albert Edward	Franz Joseph Land	м 3 :13
Albuquerque Is	Colombia	н 7 :33
Alcester	Trobriand Is	I 25 :1
Aldabra	Seychelles Is	L 15 :2
Aldea	Chili	н 6 :24
Alderney	England & Wales	C 17:66
Aleutian Is		J 2
Alexander Archipelago	Alaska	F 3 :7
Alexandra	Andaman Is	L 3 :5
Alexandra	Franz Joseph Land	M 3 :1
Alifuri	Maldive Is	L 11 :10
Almagro	Chili	н 6 :24
Alofi	Hoorn Is	J 13 :1
Alonnisos see Iliodhromia		
Alor	Java	D 40 :10
Alphonse	Seychelles Is	L 15 :3

Altamura	Mexico	F 7	:49
Amager	Dermark	C 32	+ :13
